Made To Order Gates - Order Form

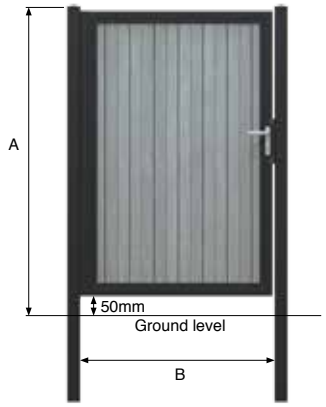

Choose from WPC or polymer infills

We are pleased to offer steel framed gates with steel posts that can incorporate a wide choice of infill boards from our WPC and Polymer ranges. These gates can be tailored to your exact requirements and seamlessly integrated with one of our many fencing systems, offering a total perimeter solution.

Our gates are made using quality gate hardware with steel posts and steel frames, that are galvanised and powder coated afterwards to black RAL 9005 as standard or another RAL colour of your choice if specified.
