Roof Edge Protection

Roof Edge Protection can now be designed and calculated to meet the new BS 13700 counterweighted guardrail systems standard. The Roof Edge Protection system requires no fixings or drilling and subsequently no repair to the roof membrane. It is suitable for flat or nearly flat roofs. The system operates on a counterbalance principle using PVC counterweights as the main component. A galvanised foot supports the handrail post, this includes an integral toeplate facility which is a requirement if there is no perimeter edge upstand.

- TUV Certificate no. Z1A 04 03 50796 001
- Complies with BS EN 14122-3:2001 & EN 13374
- Rapid installation
- 25kg maximum component weight
- We can provide BS 1300 calculations
- No welding or special tools required
- Bolt on toeplate facility to comply with HSG 33
- For use on asphalt, coated steel sheet or concrete mineral felt roofs. Effectively maintenance free with galvanised to BS EN ISO 146 malleable iron fittings

Composite Deck Boards

Victoria Range - Uses less composite material thanks to the 'M' design on the underside, making the board lighter and more economic, the perfect cost-friendly choice for every garden, balcony or patio. Boards are single-sided with a choice of natural woodgrain effect or a traditional grooved effect across all the colours.

All boards are available in Teak, Redwood, Grey and Ebony with matching starter and fascia boards.

Fascia Boards
Double-Sided

Natural Range - Features a 360° wrap around Polymer Capstock shield that encapsulates the hollow core deck board and gives it year-round protection against the elements. Suitable for a variety of outdoor uses and available in 3 colours, these double-sided boards have an enhanced natural woodgrain effect one side and traditional flat sanded effect the other.

Boards are available in Cedar Dawn, Platinum Ash and Twilight Grey with matching starter boards, fascia boards and L shaped trims.

Natural boards from £67.00 per square metre

Fire rated decking solutions

Aluminium Decking System

All elements of the **NEW** Synergised Connected achieve Euroclass Classifications of A2fl-s1. The latest offering to our aluminium decking range is the Synergised Connected system in anthracite RAL 7016. It is manufactured from structural grade 6063 T6 Aluminium, and supplied with a non-slip powder coated finish. Its unique interlocking boards allows the system to stay seamlessly connected, whilst offering integrated drainage channels, to direct rainwater away from under the deck. All boards are discreetly and quickly fixed on to the substructure, before fixings are hidden from view by the next adjoining board.

How To Install Your Deck

Screw down the starter trim.

Connect your first board.

Screw down the deck board.

Connect next board and repeat.

Screw down final board and mitre edging trim.

Features:

- Cost effective, quick & easy to install
- Fully non-combustible. A2fl-s1 fire rated
- No gaps between boards
- Integrated drainage channels
- Made from structural grade 6063 T6 aluminium
- Non-slip design
- Powder coated anthracite RAL 7016
- 10 year warranty on powder coating
- Compatible with Synergised subframe and cradles
- Long lasting & low maintenance
- These sections can be screwed directly onto any subframe or substrate

Cantilever gate kits. Build on site in just...

Cantilever Gate Kits

Our new cantilever kits are supplied complete, out of the box and ready to install. All fixings (other than concrete bolts) are included in the kit with everything ready to bolt/screw together on site.

The kit includes an upper guide roller to guide the gate along the steel gate post that is supplied and a support bracket to attach the end stop to a brick pillar for when the gate is in the closed position.

You can clad the gate frames in a choice of F.H. Brundle mesh, WPC composite boards, aluminium gate infill boards or a material of your choice.

Full technical and assembly details available on www.fhbrundle.co.uk

Framed Infill Panels

Quick and easy to install, mesh infill panels help provide extra security in a handrail, balustrade or guardrail. We provide a range of mesh infill panels, and safety mesh for railings. Our galvanised single and double infill panels fit the 1.2m and 1.5m post centres of our pre-assembled Tube Clamp posts, and also our post protectors.

Gabions offer the most cost-effective and rapidly deployed solution for retaining wall systems. They are used in a huge range of situations including landscaping, to stabilising earth movement and canal refurbishment, all while achieving a robust yet natural look.

Flat Pack Gabions

Profiled & 'U' Edging Sections

Edging and Framing Sections are suitable for framing welded mesh, perforated and expanded metal sheets. They're an excellent way of fixing and protecting sheets of metal, as well as making them easier and safer to handle.
